**A. Beneficiary Complaints**

Under Medicare law, Quality Improvement Organizations (QIOs) review complaints about the quality of care that Medicare patients receive. The complaints come from Medicare patients and/or their representatives. In reviewing a complaint, the QIO looks at the services a patient received and decides whether those services met standards of health care that are commonly accepted by physicians and others in the medical community.

Quality of care complaints may involve more than one concern, due to the following: (1) more than one quality of care concern in a single setting; (2) the same quality of care complaint for a single patient episode of illness involving multiple settings and/or providers; (3) or more than one quality of care concern involving more than one setting and/or provider. For example, a Medicare beneficiary complaint related to a hospital stay might include several different quality of care concerns or a beneficiary who was hospitalized and then moved into a skilled nursing facility or other outpatient hospital setting might have the same quality of care concern occur in each type of setting. Consequently, for a specific Setting or Provider type, the number of quality of care concerns confirmed by the QIO may exceed the number of beneficiary cases reviewed.

### **B. Hospital Admission and Continued Stay Concerns**

Under Medicare law, QIOs review the need for inpatient hospital care and certain on-going outpatient treatments. They help determine whether a patient received care in the proper place or “care setting.” This review may take place either before, during or after a hospitalization or treatment. Once a patient or their representative asks the QIO to review a “Hospital Issued Notice of Non-Coverage,” or HINN, the QIO conducts a review and issues either a denial notice or a notice explaining that the care would be, or is, covered. If a hospital issues a HINN and the beneficiary has financial liability for care rendered but the patient does not request a review, the QIO automatically reviews the case after the fact in what is called “retrospective review.” In all reviews, the QIO staff looks carefully at the patient’s medical record to decide if an admission or continued stay or care is/was needed.
